

Mouse IgG-heavy and light chain Antibody

Affinity Purified

Alkaline Phosphatase conjugated

Produced in Goat

Catalog No.

A90-116AP

Storage: 2 - 8 C
Amount: 1 ml at 1 mg/ml
Buffer: 50 mM HEPES pH 7.1, 0.1 M NaCl, 1 mM MgCl₂, 0.1 mM ZnCl₂ containing 0.2% BSA and 0.09% NaN₃
Shelf Life: 1 year from date of receipt

Production Procedures: The antibody was isolated by affinity chromatography using antigen coupled to agarose beads and conjugated to alkaline phosphatase (alkphos).

Antibody concentration was determined by extinction coefficient prior to conjugation: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG. Molar enzyme:antibody protein ratio is 1:1.

By immunoelectrophoresis and ELISA this antibody reacts specifically with mouse IgG and with light chains common to other mouse immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins. This antibody may cross react with IgG from other species.

Country of Origin: USA

Notes: For In vitro laboratory use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.

This product may not be resold or modified for resale without the prior written approval of Bethyl Laboratories, Inc.

Applications: Not all listed applications have been specifically tested. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilutions immediately before use. Suggested starting dilutions are:

ELISA: 1:1000 – 1:10,000

Western Blot: 1:1000 – 1:10,000

Immunohistochemistry: 1:200 – 1:1000

Immunocytochemistry: 1:200 – 1:1000

In some cases, the antibody may be diluted further than indicated.

MATERIAL SAFETY DATA SHEET

Contents Description

This product contains Alkaline Phosphatase conjugated Goat immunoglobulin G (IgG) protein in 50 mM HEPES pH 7.1, 0.1 M NaCl, 1 mM MgCl₂, 0.1 mM ZnCl₂ containing 0.2% BSA and 0.09% NaN₃.

Hazardous Ingredients

Goat IgG - No known toxicity for this biological material.

Bovine Serum Albumin (BSA) - No known toxicity for this biological material. (Applies only to buffers containing BSA.)

Alkaline Phosphatase - No known toxicity for this calf intestine material.

Sodium Azide (NaN₃) - AZIDE FORMS EXPLOSIVE CHEMICAL COMPOUNDS WITH LEAD AND COPPER PLUMBING. CARE MUST BE TAKEN TO WASH WASTE DOWN DRAINS WITH LARGE VOLUMES OF WATER.
LD50 oral mouse - 27 mg/kg.

Wash all affected areas with large volumes of water and if swallowed consult your physician immediately.
