

Mouse IgG-heavy and light chain Antibody

Serum

Produced in Rabbit

Catalog No.

A90-117

Storage: 2 - 8 C

Amount: 2 ml

Buffer: Serum containing 0.1 % Sodium Azide

Shelf Life: 2 years from date of receipt

Production Procedures: By immunoelectrophoresis, the antiserum reacts specifically with mouse IgG and with light chains common to other mouse immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins.

This antibody may cross react with IgG from other species.

Country of Origin: USA

Notes: For In vitro laboratory use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.

This product may not be resold or modified for resale without the prior written approval of Bethyl Laboratories, Inc.

Applications: For use in precipitin gel reactions; such as, immunoelectrophoresis and double diffusion Ouchterlony. Optimal working dilutions should be determined experimentally by the investigator.

MATERIAL SAFETY DATA SHEET

Contents Description

This product contains Serum containing 0.1 % Sodium Azide

Hazardous Ingredients

Rabbit serum - No known toxicity for this biological material.

Sodium Azide (NaN_3) - AZIDE FORMS EXPLOSIVE CHEMICAL COMPOUNDS WITH LEAD AND COPPER PLUMBING. CARE MUST BE TAKEN TO WASH WASTE DOWN DRAINS WITH LARGE VOLUMES OF WATER.
LD50 oral mouse - 27 mg/kg.

Wash all affected areas with large volumes of water and if swallowed consult your physician immediately.
