CAPSE | Cell attachment protein in somatic embryogenesis

This product is available to order on "payment after testing" terms.

For more information please contact us at support@agrisera.com

product information

background	■	CAPSE - cell attachment protein in somatic embryogenesis.
immunogen	■	<u>KLH</u> -conjugated synthetic peptide derived from C-terminal domain of CAPSE from <i>Daucus carota</i> (Carrot) <u>Q616Y6</u>
antibody format	■	rabbit polyclonal serum lyophilized
quantity	■	50 µl for reconstitution add 50 µl, of sterile water.
storage	■	store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tubes. Store reconstituted antibodies at 4°C.
tested applications	■	Western blot (WB)
related products	■	
additional information	■	to be added when available

application information

recommended dilution	■	1:100 - 1:500 (WB)
expected apparent MW	■	48 kDa
confirmed reactivity	■	to be determined
predicted reactivity	■	<i>Daucus carota</i>
not reactive in	■	no confirmed exceptions from predicted reactivity are currently known
additional information	■	to be added when available
selected references	■	to be added when available
