Product Datasheet GABARAP Antibody NBP1-71771SS

Unit Size: 0.025 ml

Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.

NBP1-71771SS

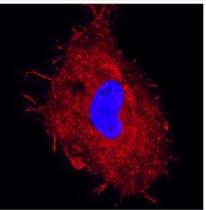

GABARAP Antibody

| • | |
|-----------------------------|---|
| Product Information | |
| Unit Size | 0.025 ml |
| Concentration | 1.11 mg/ml |
| Storage | Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles. |
| Clonality | Polyclonal |
| Preservative | 0.05% Sodium Azide |
| Purity | Immunogen affinity purified |
| Buffer | PBS, 30% glycerol |
| Product Description | |
| Host | Rabbit |
| Gene ID | 11337 |
| Gene Symbol | GABARAP |
| Species | Human, Mouse |
| Species Reactivity | Human and mouse. Predicted to react with rat based on 100% sequence homology. |
| Immunogen | A synthetic peptide made to a C-terminal region of the human GABARAP protein (within residues 50-117). [Swiss-Prot O95166] |
| Product Application Details | |
| Applications | Western Blot, Immunocytochemistry/Immunofluorescence, Immunohistochemistry, Immunohistochemistry-Paraffin |
| Recommended Dilutions | Immunocytochemistry/Immunofluorescence 1:100, Immunohistochemistry 1:200, Immunohistochemistry-Paraffin 1:200, Western Blot 1:100-1:2000 |
| Application Notes | This GABARAP antibody is useful for ICC/IF and IHC-P. Prior to immunostaining paraffin tissues, antigen retrieval with sodium citrate buffer (pH 6.0) is recommended. |
| | |

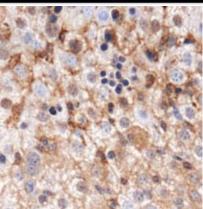

Images

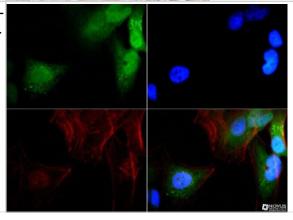

Immunocytochemistry/Immunofluorescence: GABARAP Antibody [NBP1-71771] - analysis of GABARAP in Raw 264.7 cells using anti-GABARAP antibody (red). Nuclei were counterstained with DAPI (blue).

Immunohistochemistry: GABARAP Antibody [NBP1-71771] - Analysis of GABARAP in mouse liver using DAB with hematoxylin counterstain.

Immunocytochemistry/Immunofluorescence: GABARAP Antibody [NBP1-71771] - GABARAP antibody was tested in HeLa cells with FITC (green). Nuclei and actin were counterstained with Dapi (blue) and Phalloidin (red).

Procedures

Immunohistochemistry-Paraffin protocol for GABARAP Antibody (NBP1-71771)

Immunohistochemistry-Paraffin Embedded Sections

Antigen Unmasking:

Bring slides to a boil in 10 mM sodium citrate buffer (pH 6.0) then maintain at a sub-boiling temperature for 10 minutes. Cool slides on bench-top for 30 minutes.

Staining:

- 1. Wash sections in deionized water three times for 5 minutes each.
- 2. Wash sections in wash buffer for 5 minutes.
- 3. Block each section with 100-400 ul blocking solution for 1 hour at room temperature.
- 4. Remove blocking solution and add 100-400 ul diluted primary antibody. Incubate overnight at 4C.
- 5. Remove antibody solution and wash sections in wash buffer three times for 5 minutes each.
- 6. Add 100-400 ul biotinylated diluted secondary antibody. Incubate 30 minutes at room temperature.
- 7. Remove secondary antibody solution and wash sections three times with wash buffer for 5 minutes each.
- 8. Add 100-400 ul Streptavidin-HRP reagent to each section and incubate for 30 minutes at room temperature.
- 9. Wash sections three times in wash buffer for 5 minutes each.
- 10. Add 100-400 ul DAB substrate to each section and monitor staining closely.
- 11. As soon as the sections develop, immerse slides in deionized water.
- 12. Counterstain sections in hematoxylin.
- 13. Wash sections in deionized water two times for 5 minutes each.
- 14. Dehydrate sections.
- 15. Mount coverslips.

Immunocytochemistry/Immunofluorescence Protocol for GABARAP Antibody (NBP1-71771) Immunocytochemistry Protocol

Culture cells to appropriate density in 35 mm culture dishes or 6-well plates.

- 1. Remove culture medium and add 10% formalin to the dish. Fix at room temperature for 30 minutes.
- 2. Remove the formalin and add ice cold methanol. Incubate for 5-10 minutes.
- 3. Remove methanol and add washing solution (i.e. PBS). Be sure to not let the specimen dry out. Wash three times for 10 minutes.
- 4. To block nonspecific antibody binding incubate in 10% normal goat serum from 1 hour to overnight at room temperature.
- 5. Add primary antibody at appropriate dilution and incubate at room temperature from 2 hours to overnight at room temperature.
- 6. Remove primary antibody and replace with washing solution. Wash three times for 10 minutes.
- 7. Add secondary antibody at appropriate dilution. Incubate for 1 hour at room temperature.
- 8. Remove antibody and replace with wash solution, then wash for 10 minutes. Add Hoechst 33258 to wash solution at 1:25,0000 and incubate for 10 minutes. Wash a third time for 10 minutes.
- 9. Cells can be viewed directly after washing. The plates can also be stored in PBS containing Azide covered in Parafilm (TM). Cells can also be cover-slipped using Fluoromount, with appropriate sealing.

*The above information is only intended as a guide. The researcher should determine what protocol best meets their needs. Please follow safe laboratory procedures.
