Reconstitution	Rehydrate the lyophilized antibody with 150µl of distilled water and 250µl PBS or 50% glycerol in PBS. Avoid repeat freeze-thaw of this product for best results.	
Storage Condition	For optimal results, use the antibody as soon as possible after reconstitution. Store in lyophilized form unless needed and reconstitute immediately before use. Once reconstituted, the antibody should be stable for a few days at -4°C. For storage up to a few months, prepare small aliquots after reconstitution and freeze at -20°C or -80°C. Repeated freeze thaw cycles should be strictly avoided.
