

# Anti-Alfa Hsp90C (plant) Catalog# SPC-317D

Size: 100µL

PO Box 55036, Cadboro Bay  
3825 Cadboro Bay Road,  
Victoria, BC, V8N 4G0, Canada

This product is for *in vitro* research use only and is not intended for use in humans or animals

Product	Rabbit anti-Hsp90C antibody; polyclonal
Clone	N/A
Immunogen	C-terminal 238 amino acids of Hsp90C expressed with N- and C-terminal hexahistidine tags in <i>E.coli</i> , purified with Ni-NTA.
Host and Subclass	Rabbit
Cited Applications	WB, IP
Specificity	Detects ~83kDa. Hsp90C is easily degraded and the antibody detects these degradation fragments.
Species cross-reactivity	<i>Chlamydomonas reinhardtii</i> . Other species not yet tested.
Format	Lyophilized rabbit serum. (For reconstitution add 100µL of sterile water).
Working dilution	Recommended dilution for WB 1:3000 with ECL
Storage and stability	-20°C; 1 year+; shipped on cold packs or ambient

### Scientific Background

Hsp90C is a nuclear-encoded, chloroplast-targeted chaperone of the Hsp90 family. In the chloroplast, it is localized to the soluble stroma fractin, but also to thylakoids and low-density membranes containing inner envelopes. Hsp90C is expressed under basal conditions and is strongly induced by heat shock and moderately by light. It forms dimers that interact with Hsp70B. Hsp90C displays a weak ATPase activity that is inhibited by radicicol (1).

# Material Safety Data Sheet

## Anti-HSP90C (Polyclonal Antibody) SPC-317

This product is for *in vitro* research use only and is not intended for use in humans or animals

The below information is believed to be correct but does not purport to be all inclusive and shall be used only as a guide. StressMarq shall not be held liable for any damage resulting from handling or from contact with the above product. See the Technical Specification, Packing Slip, Invoice, and Product Catalogue for additional terms and conditions of sale.

---

### Hazardous Ingredients

The physical, chemical and toxicological properties of these components have not been fully investigated. It is recommended that all laboratory personnel follow standard laboratory safety procedures when handling this product. Safety procedures should include wearing OSHA approved safety glasses, gloves and protective clothing. Direct physical contact with this product should be avoided.

#### Known Hazardous Components

None

#### CAS Number

#### Percent

---

### Physical Data

This product consists of rabbit serum shipped on gel packs. The physical properties of this product have not been investigated thoroughly.

---

### Fire and Explosion Hazard and Reactivity Data

NOT APPLICABLE

---

### Toxicological Properties

May be harmful by inhalation, ingestion, or skin absorption. The toxicological properties of this product have not been investigated thoroughly. Exercise due caution.

---

### Preventative Measures

Wear chemical safety goggles and compatible chemical-resistant gloves. Avoid inhalation, contact with eyes, skin or clothing.

---

### Spill and Leak Procedures

Observe all federal, state and local environmental regulations.

- Wear protective equipment.
- Absorb on sand or vermiculite and place in closed containers for disposal.
- Dispose or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

---

### First Aid Measures

- If swallowed, wash out mouth with water, provided person is conscious. Call a physician.
- In case of skin contact, flush with copious amounts of water for at least 15 minutes. Remove contaminated clothing and shoes. If a rash or other irritation develops, call a physician.
- If inhaled, remove to fresh air. If breathing becomes difficult, call a physician.
- In case of eye contact, flush with copious amounts of water for at least 15 minutes while separating the eyelids with fingers. Call a physician.
