Edit-R Cas9 nucleases

- Purified protein or mRNA for DNA-free gene editing workflows
- Lentiviral option for generating a stable Cas9 expressing cell line
- Configure expression constructs with six SMARTchoice constitutive promoter options or an inducible format

DNA-free Cas9 nuclease

- **Cas9 nuclease mRNA**

Purified Cas9 mRNA for transient Cas9 nuclease expression. Fluorescent options available for sorting, enrichment and visualization of delivery.

- **Cas9 nuclease protein NLS**

Purified Cas9 protein ready-to-use for DNA-free workflows.

Vector-based Cas9 nuclease

- **Lentiviral Cas9 nuclease reagents**

Purified lentiviral particles or plasmid DNA for generation of stable Cas9 nuclease-expressing cell populations. Constitutive or inducible promoter options are available.

- **Cas9 nuclease expression reagents**

Non-lentiviral vectors provided as endotoxin-free purified DNA for direct co-transfection with Edit-R guide RNA.

2-J-3) 下の画面はCas9 nuclease protein NLSを選択&クリックした結果が表示された状態です。赤実線枠の項目を選択&クリックすることで、濃度や容量を選択できます。「Add to Cart」ボタン(青点線枠)をクリックすると製品がショッピングカートに入ります。

Edit-R Cas9 nuclease protein NLS

A DNA-free option for Cas9 nuclease expression

Purified Cas9 nuclease protein NLS for co-transfection with synthetic guide RNA for a completely DNA-free genome engineering system
