

Datasheet

CD19 monoclonal antibody, clone ABN-36

assembles with the antigen receptor of B lymphocytes in order to decrease the threshold for antigen receptor-dependent stimulation. [provided by RefSeq]

Catalog Number: MAB10741

Regulatory Status: For research use only (RUO)

Product Description: Mouse monoclonal antibody raised against CD19.

Clone Name: ABN-36

Immunogen: CD19.

Host: Mouse

Reactivity: Human

Applications: IHC
(See our web site product page for detailed applications information)

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Isotype: IgG1, kappa

Recommend Usage: The optimal working dilution should be determined by the end user.

Storage Buffer: In PBS, pH 7.4 (protein base, 0.09% sodium azide)

Storage Instruction: Store at 4°C is stable for 3 years.

Entrez GeneID: 930

Gene Symbol: CD19

Gene Alias: B4, MGC12802

Gene Summary: Lymphocytes proliferate and differentiate in response to various concentrations of different antigens. The ability of the B cell to respond in a specific, yet sensitive manner to the various antigens is achieved with the use of low-affinity antigen receptors. This gene encodes a cell surface molecule which
