

Datasheet

CD8 monoclonal antibody, clone MEM-31 (PerCP)

Catalog Number: MAB4602

Regulatory Status: For research use only (RUO)

Product Description: Mouse monoclonal antibody raised against native CD8.

Clone Name: MEM-31

Immunogen: Native purified CD8 from Crude thymus membrane fraction.

Host: Mouse

Reactivity: Human

Applications: Flow Cyt
(See our web site product page for detailed applications information)

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Specificity: This antibody recognizes a conformationally-dependent epitope of CD8, a cell surface glycoprotein found on most cytotoxic T lymphocytes that mediates efficient cell-cell interactions within the immune system. CD8 is a disulfide-linked dimer and exists as a CD8 alpha/alpha homodimer or CD8 alpha/beta heterodimer (each monomer approx. 32-34 kDa).

This antibody does not react with formaldehyde-fixed cells; negative in Western Blot application.

Form: Liquid

Conjugation: PerCP

Isotype: IgG2a

Recommend Usage: Flow Cytometry (10 ul in human blood cells 100 ul in whole blood or 10⁶ cells in a suspension)

The optimal working dilution should be determined by the end user.

Storage Buffer: In PBS (0.2% BSA, 0.09% sodium azide)

Storage Instruction: Store in the dark at 4 °C. Do not freeze.

Avoid prolonged exposure to light.

Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 925|926

Gene Symbol: CD8A

Gene Alias: CD8, Leu2, MAL, p32
