## Monoclonal Antibody to CD90 - FITC

CDw90, THY1, Thy-1, Thy-1 membrane glycoprotein Alternate names:

**Catalog No.:** AM08054FC-N

**Quantity:** 0.5 mg **Concentration:** 0.5 mg/ml

**Background:** CD90/Thv-1, a GPI-anchored molecule and one of the smallest members of the

> immunoglobulin superfamily of cell surface receptors, consists of a single V-set domain. (Ref.1-4) It is expressed on thymocytes, peripheral T lymphocytes, some intraepithelial T lymphocytes and neurons of all mouse strains. (Ref.1,2) MAb G7 stimulates T-cell proliferation and IL-2 secretion, via signalling through the T-cell receptor/CD3 complex. (Ref.1,5-7). It has also been reported to promote apoptosis of thymocytes and CTL clones

(Ref.4,7) and to mediate adhesion of thymocytes to thymic stroma. (Ref.8)

**Uniprot ID:** P01831

**NCBI:** NP 033408.1

GeneID: 21838 **Host / Isotype:** Rat / IgG2c

Clone: G7

Format: State: Liquid purified Ig fraction.

**Buffer System:** PBS containing 0.09% Sodium Azide as preservative.

Label: FITC - Fluorescein Isothiocyanate Isomer 1

Flow Cytometry:  $\langle \ \ | = 1 \, \mu g / 10e6 \, cells$ . (Ref.1,10) **Applications:** 

Other applications not tested. Optimal dilutions are dependent on conditions and should

be determined by the user.

**Specificity:** This antibody recognises Thy-1.1 and Thy-1.2 alloantigens (Thy-1 epitope region A).

Species: Mouse.

Other species not tested.

Store the antibody undiluted at 2-8°C. Storage:

DO NOT FREEZE!

This product is photosensitive and should be protected from light.

Avoid repeated freezing and thawing. Shelf life: one year from despatch.

## **Pictures:**

Immunofluorescent Staining: BALB/c mesenteric lymph node cells were stained with either Rat IgG2c-FITC (as a Negative Control) or Rat anti-Mouse CD90-FITC. Lymphocytes were then gated and analyzed on a FACScan(TM) flow cytometer (BDIS, San Jose, CA). Amount Used: 1 µg/10e6 cells.
