

Monoclonal Antibody to KLRG1 - PE

Alternate names:	C-type lectin domain family 15 member A, CLEC15A, ITIM-containing receptor MAFA-L, KLRG1, Killer cell lectin-like receptor subfamily G member 1, MAFA, MAFA-like receptor, MAFAL, Mast cell function-associated antigen
Catalog No.:	AM08067RP-N
Quantity:	0.2 mg
Concentration:	0.1 mg/ml
Background:	Killer cell lectin-like receptor G1 (KLRG1; formerly known as mouse MAFA or 2F1 Ag), a homodimeric member of the lectin-like type 2 transmembrane receptor family that contain characteristic immunoreceptor tyrosine-based inhibitory motifs (ITIMs) in their cytoplasmic domains. (Ref.1,2) These ITIMs interact with the SH2 domains of protein phosphatases such as SHP1. (Ref.3,4) Cell surface expression of KLRG1 is up-regulated by expression of MHC class I molecules. The effect of MHC class I expression is indirect, and can be mediated by interactions with class I-specific Ly49 inhibitory receptors. (Ref.1)
Uniprot ID:	O88713
NCBI:	NP_058666.1
GeneID:	50928
Host / Isotype:	Hamster / IgG
Clone:	2F1
Immunogen:	Activated NK (A-LAK) cells from B6 (H-2b) mice. (Ref.1)
Format:	State: Liquid purified Ig fraction. Buffer System: PBS containing 0.09% Sodium Azide as preservative and a stabilizing agent. Label: PE – R-Phycoerythrin
Applications:	Flow Cytometry: < / = 0.2 µg/10e6 cells. (Ref.1,5) Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody reacts with Killer Cell Lectin-like Receptor G1 (KLRG1 formerly known as mouse MAFA or 2F1-Ag). It stains 30-60% of NK1.1+CD3- splenocytes, and a small fraction of T cells in all mouse strains tested (C57BL/6, BALB/c, 129/J, C3H.SW, AKR/J, SJL). (Ref.1,5) Species: Mouse. Other species not tested.

Storage:

Store the antibody undiluted at 2-8°C.

DO NOT FREEZE!

This product is photosensitive and should be protected from light.

Avoid repeated freezing and thawing.

Shelf life: one year from despatch.
