Monoclonal Antibody to CD4 - PE

T-cell surface antigen T4/Leu-3, T-cell surface glycoprotein CD4 Alternate names:

Catalog No.: AM08115RP-N

Quantity: 0.1 mg **Concentration:** $0.1 \, \text{mg/ml}$

Background: CD4 is a single chain transmembraneous glycoprotein (59 kDa) which belongs to the

immunoglobulin superfamily. CD4 is present on a subset of Tlymphocytes

("helper/inducer" T cells) and is also expressed at a lower level on monocytes, tissue macrophages and granulocytes. The antigen is involved in binding to MHC class II molecules. The intracellular domain of the antigen is associated with p56lck protein

tyrosine kinase.

Uniprot ID: Q6Q4G0 **NCBI:** 9031

Mouse / IgG1 **Host / Isotype:**

Clone: CT-4

Format: State: Liquid purified Ig fraction.

Buffer System: PBS containing 0.09% Sodium Azide as preservative and a stabilizing

Label: PE - R-Phycoerythrin

Applications: Flow Cytometry: $\langle / = 0.2 \,\mu g/10e6 \, cells. \, (Ref. 1)$

Other applications not tested. Optimal dilutions are dependent on conditions and should

be determined by the user.

Specificity: Specific to CD4 (Mr. 64 kda).

This antibody inhibits both PHA- and Con A-induced proliferative responses of splenocytes,

and PWM-induced IL-2 production. Species: Chicken and Turkey. Other species not tested.

Store the antibody undiluted at 2-8°C. Storage:

DO NOT FREEZE!

This product is photosensitive and should be protected from light.

Avoid repeated freezing and thawing. Shelf life: one year from despatch.

Pictures:

Immunofluorescent Staining: Chicken peripheral blood mononuclear cells were double stained with Mouse anti-Chicken CD4-PE and Mouse anti-Chicken CD3-FITC (AM08114FC-N). Small lymphocytes were then gated and analyzed on a FACScan(TM) flow cytometer (BDIS, San Jose, CA). Amount Used: 0.1 µg/10e6 cells.
