	Monoclonal Antibody to CD120a / TNFR1 - PE
Alternate names:	TNF-R1, TNF-RI, TNFR-I, Tnfrsf1a, Tumor necrosis factor receptor 1, Tumor necrosis factor receptor superfamily member 1A, Tumor necrosis factor receptor type I, p55, p60
Catalog No.:	CL044RT
Quantity:	25 Tests
Background:	Tumor Necrosis Factor (TNF) is a cytokine whose function is mediated through two distinct cell surface receptors (TNF Receptor I and TNF Receptor II) that are included in the TNF Receptor superfamily along with FAS antigen and CD40. TNF Receptors I and II are 55 and 7 kDa members, respectively, of a family of cell surface molecules including nerve growth factor receptor, Fas/Apo1, CD30, OX40, and 41BB, which are characterized by cysteine rick motifs in the extracellular domain. While TNF Receptor I and TNF Receptor II share 28% sequence homology in the extracellular domains, their intracellular domains lack sequenc homology, suggesting that they differ in their internal signal transduction pathways. TNF Receptor I contains an approximately 80 amino acid death domain near its carboxy terminus capable of transmitting an apoptotic signal through its interaction with TRADD (TNF Receptor I can also activate the transcription factor NFkB via TRAF2 (TNF Receptor associated factor 2). The cytoplasmic domain of TNF Receptor I can directly interact with Ja kinase, thereby activating the JAK/STAT signal transduction cascade. TNF Receptor I is expressed by virtually all nucleated mammalian cells, including hepatocytes, monocytes and neutrophils, cardiac muscle cells, endothelial cells, and CD3 + hematopoietic progenitors. Both TNF alpha and TNF beta bind to TNF Receptor I.
Uniprot ID:	<u>P25118</u>
NCBI:	<u>10090</u>
Host / Isotype:	Rat / IgG2a
Clone:	HM104
Format:	State: Liquid purified Ig fraction. Purification: Ion Exchange Chromatography. Buffer System: PBS containing 0.02% Sodium Azide as preservative and 0.5% BSA as stabilizer. Label: PE – R. Phycoerythrin (RPE)
Applications:	Flow Cytometry: Use 10 µl of neat antibody to label 10e6 cells in 100 µl. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognises an extracellular region of mouse CD120a (TNFR1, p55). Species: Mouse. Other species not tested.

For research and in vitro use only. Not for diagnostic or therapeutic work. Material Safety Datasheets are available at www.acris-antibodies.com or on request.

CL044RT: Monoclonal Antibody to CD120a / TNFR1 - PE

Storage:

Store the antibody undiluted at 2-8°C. **DO NOT FREEZE!** This product is photosensitive and should be protected from light. Shelf life: One year from despatch.
