

## Polyclonal Antibody to Horse IgG F(ab')2 -FITC-

Alternate names: Horse IgG, Horse Immunoglobulin G

Catalog No.: R1331F Quantity: 1.5 mg

**Concentration:** 2.0 mg/ml (by UV absorbance at 280 nm)

Host: Rabbit

Immunogen: Horse IgG F(ab')2 fragment.

Format: State: Lyophilized purified Ig fraction.

Purification: Immunoaffinity chromatography.

**Buffer System:**  $0.01\,M$  Sodium Phosphate,  $0.14\,M$  Sodium Chloride, pH 7.6 with 10 mg/ml Bovine Serum Albumin (BSA, IgG and Protease free) as stabilizer and 0.01% (w/v) sodium

azide as preservative.

Label: FITC – Fluorescein isothiocyanate (Molecular Weight 390 daltons)

Absorption / Emission: 495 nm / 528 nm

Molar Ratio: 3.2 moles FITC per mole of Rabbit IgG.

Reconstitution: Restore with 1.0 ml of deionized water (or equivalent).

Applications: Suitable for Immunomicroscopy (1/500-1/2,500) and Flow cytometry (1/2,000-1/10,000) or

FACS analysis as well as other antibody based fluorescent assays requiring lot-to-lot

consistency.

Other applications not tested. Optimal dilutions are dependent on conditions and should

be determined by the user.

Specificity: This product was prepared from monospecific antiserum by immunoaffinity

chromatography using Horse IgG coupled to agarose beads followed by solid phase

adsorption(s) to remove any unwanted reactivities.

Assay by immunoelectrophoresis resulted in a single precipitin arc against

anti-Fluorescein, anti-Rabbit Serum, Horse IgG, Horse IgG F(ab')2 and Horse Serum.

No reaction was observed against Horse IgG F(c).

Storage: Store vial at 2-8°C prior to restoration. For extended storage add glycerol to 50% and then

aliquot contents and freeze at -20°C or below. Centrifuge product if not completely clear

after standing at room temperature.

This antibody is stable for one month at 2-8°C as an undiluted liquid.

Dilute only prior to immediate use. Avoid repeated freezing and thawing. Shelf life: One year from despatch.
