

Monoclonal Antibody to CD195 / CCR5 - PE

Alternate names:	C-C CKR-5, C-C chemokine receptor type 5, CC-CKR-5, CCR-5, CHEMR13, CMKBR5, HIV-1 fusion coreceptor
Catalog No.:	SM1861R
Quantity:	100 Tests
Background:	CD195 acts as a receptor for a number of chemokines including RANTES and eotaxin and also serves as a coreceptor for the entry of HIV into cells. CD195 is expressed by a subset of T lymphocytes and by monocytes.
Uniprot ID:	P51681
NCBI:	NP_000570.1
GeneID:	1234
Host / Isotype:	Rat / IgG1
Clone:	HEK/1/85a
Immunogen:	CHO cells transfected with human CCR5. Spleen cells from immunised rats were fused with cell of the rat Y3 myeloma cell line.
Format:	State: Lyophilized purified IgG Purification: Affinity chromatography on Protein G Buffer System: PBS containing 0.09% Sodium Azide and 1% Bovine Serum Albumin Label: PE Reconstitution: Restore with 1 ml distilled water
Applications:	Flow Cytometry: Neat - 1/5; Use 10µl of the suggested working dilution to label 10e6 cells in 100µl. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognises the CD195 cell surface antigen, a 45kD glycoprotein also known as CCR5. Species: Human. Other species not tested.
Storage:	Prior to and following reconstitution store the antibody at 2-8°C. DO NOT FREEZE! This product is photosensitive and should be protected from light. Shelf life: one year from despatch.
