

Rat Tail Type-I Collagen Solution

Order Information

Product Name: Rat Tail Type I Collagen Solution
Catalogue Number: cAP-06
Concentration: 3.0mg/ml Collagen in 0.2M Acetic Acid
Size: 100mg
Storage: 2-8°C

Product Description:

Collagen is a fibrous protein found in the extracellular matrix and connective tissue. Type I collagen is the most common form of collagen prevalent in bones, tendons and skin. It consists of three intertwined coiled subunits: two $\alpha 1$ (I) chains and one $\alpha 2$ (I) chain. Each chain contains precisely 1050 amino acids wound tightly around one another in a characteristic right-handed triple helix. The triple-helical structure of collagen arises from its unusual abundance of three amino acids: glycine, proline, and hydroxyproline. These amino acids in collagen appear in a characteristic repeating motif Gly-X-Y, where X is usually proline and Y is usually hydroxyproline.

Product Specifications:

Source: Rat tail tendons
Buffer: 0.20 M Acetic Acid
Celsius Shelf life: 12 months **Storage:** 2-8°C
Purity: > 95% SDS PAGE
Concentration: 3 mg/ml (Sircol Assay)
Product pH: ~3.0
Product Conductivity: 0.8 ms/cm

Sterility Testing: This product has been tested for 14 days after incubation in a 37°C incubator. It is free of bacterial and fungal contamination. Product has shown to be negative with respect to mycoplasma contamination by Real-Time PCR.

Shelf Life: 12months at 4 °C

Applications: Culture wares surface coating with collagen solution:

- 1) Add recommended volume of collagen solution directly to dishes, plates, or inserts.
- 2) Incubate at room temperature in a biological safety cabinet for 1 hour.
- 3) Carefully aspirate remaining solution.
- 4) Rinse the culture wares with PBS to remove acid.

Plates may be used immediately or air-dried first and then stored at 4-8°C for up to one week.

Culture wares	Area (cm ²)	Collagen Vol (ml)	Wash Vol (ml)
96 well	0.143	0.025	0.05
24 well	0.33	0.05	0.1
12 well	1.12	0.25	0.4
6 well	4.67	0.6	1

THESE PRODUCTS ARE FOR RESEARCH USE ONLY

Caution: Handling human and animal tissue derived products is potentially bio-hazardous. Although each cell strain is tested negative for HIV, HBV and HCV DNA, or pathogens, diagnostic tests are not necessarily 100% accurate; therefore proper precautions must be taken to avoid inadvertent exposure. Always wear gloves and safety glasses when working with these materials. Never mouth pipette. We recommend following the universal procedures for handling products of human origin as the minimum precaution against contamination.
