Mouse Monoclonal anti-human E-Cadherin

ORDERING INFORMATION

Catalog No:	hAP-0039
Size:	100 µg
Storage:	< -20° C
Immunogen:	human recombinant E-Cadherin protein
Ig Type:	mouse IgG2
Clone:	MM0039-21E9
Applications:	Western blot and Immunohistochemistry

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with purified recombinant human E-Cadherin).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500 µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human E-Cadherin in western blot and Elisa.

Applications:

- | | | |
|--|------------|---------------------|
| 1. Western blotting: | Yes | (1:100-1000) |
| 2. Immunohistochemistry (Paraffin): | Yes | (1:50-200) |

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
