

Rabbit antibody to human capsaicin receptor (531-541): whole serum

Catalogue No.:	R-053-100
Description:	TISSUE SPECIFICITY: Predominantly expressed in trigeminal and dorsal root sensory ganglia. Isoform 1 and isoform 3 are also expressed in brain and peripheral blood mononuclear cells.
Batch No.:	See product label
Unit size:	100 µl
Antigen:	A synthetic peptide (YFSHLKEYVAS) of human capsaicin receptor protein (aa: 531-541) conjugated to KLH has been used as the immunogen.
Other Names:	Transient receptor potential cation channel subfamily V member 1; TrpV1; Capsaicin receptor; Osm-9-like TRP channel 1; OTRPC1; Vanilloid receptor 1; TRPV1; VR1; VR-1;
Accession:	Capsaicin_HUMAN
Produced in:	Rabbit
Purity:	Whole serum
Applications:	IHC. Use at 1:1000 to 1:2000 dilution. This antibody has not been tested in other applications. Biosensis recommends optimal dilutions/concentrations should be determined by the end user.
Specificity:	Immunohistochemical analysis of rat DRG indicates a superb degree of specificity for this serum.
Cross-reactivity:	This antibody is known to react with rat Capsaicin and due to sequence homology is expected to react with mouse Capsaicin . Other species have not yet been tested.
Form:	Lyophilised
Reconstitution:	Reconstitute in 100 µl of sterile water. Centrifuge to remove any insoluble material.
Storage:	After reconstitution keep aliquots at -20°C for a higher stability, and at 4°C with an appropriate antibacterial agent.
Expiry Date:	12 months after purchase
