Mouse Anti-Human T-Cell Receptor V beta-23 Monoclonal Antibody

Mouse, Monoclonal (TRB@)

Cat. No. DMAB3466MH
Lot. No. (See product label)

PRODUCT INFORMATION

Product Overview: Monoclonal to T-Cell Receptor V beta-23 Phycoerythrin conjugated
Specificity: Human variable beta 23 chain of the T-cell receptor also called TCRBV23S1 according to the nomenclature of Wei, et al. There is only one member of the V beta 23 subfamily (IGRb04 sequence). Specificity has been confirmed on a mouse T-cell hybridoma expressing a mouse alpha chain together with the product of a transfected IGRb04 sequence.
Isotype: IgG1
Clone: BF 24
Host animal: Mouse. Hybridization of X63 Ag 8.653 myeloma cells with spleen cells from Balb/c mice.
Immunogen: Human T-cell line
Source: Ascites
Format: Phyco, Liquid
Applications: T-cell repertoire studies Flow cytometry: 20ul/5 x 105 cells/test or ul whole blood Each laboratory should determine an optimum working titer for use in its particular application. Other applications have not been tested but use in such assays should not necessarily be excluded.
Affinity Constant: Not determined

PACKAGING

Concentration: Not determined.
Buffer: Lyophilized from PBS containing 1mg/ml BSA
Preservative: 0.1% Sodium azide
Storage: Store (in the dark) at 2–8 C. DO NOT FREEZE!
Warning: This product contains sodium azide, which has been classified as Xn (Harmful), in European Directive 67/548/EEC in the concentration range of 0.1 – 1.0 %. When disposing of this reagent through lead or copper plumbing, flush with copious volumes of water to prevent azide build-up in drains.

ANTIGEN GENE INFORMATION

Gene Name: TRB@ T cell receptor beta locus [Homo sapiens]
Official Symbol:TRB@
Synonyms: TRB@; T cell receptor beta locus; TRB; TCRB; T-cell receptor, beta cluster; T-cell antigen receptor, beta polypeptide, T-cell receptor, beta cluster; T-Cell Receptor V beta-23
GeneID: 6957
MIM: 186930
Chromosome Location: 7q34
Pathway: Cytokines and Inflammatory Response; T Cell Receptor Signaling Pathway
