## EB08844 - Goat Anti-LMX1B Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** LMX1B antibody, LIM homeobox transcription factor 1, beta antibody, LMX1.2 antibody, MGC138325 antibody, MGC142051 antibody, NPS1 antibody, LIM homeo box transcription factor 1, beta antibody

**Official Symbol:** LMX1B

**Accession Number(s):** NP\_002307.1

**Human GeneID(s):** [4010](#)

**Non-Human GeneID(s):** 16917 (mouse), 114501 (rat)

### Immunogen

Peptide with sequence QQALTTSCYFRDRK , from the internal region of the protein sequence according to NP\_002307.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:64000.

**Western blot:** Preliminary experiments gave an approx 100kDa band in Mouse Kidney lysates after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 41.6kDa according to Human NP\_002307.1 and to Mouse NP\_034855.1. The 100kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human; Mouse, Rat
