

10-652-C025

Monoclonal Antibody to CD90 Azide Free (0.025 mg)

Clone: 5E10

Isotype: Mouse IgG1

Specificity: The mouse monoclonal antibody 5E10 recognizes CD90/Thy-1, a GPI-anchored

cell surface glycoprotein expressed predominantly on thymocytes, hematopoietic

stem cells and neurons.

HLDA V; WS Code M07, BP222 HLDA VI; WS Code BP28, E046

Regulatory Status: RUO

Immunogen: HEL erythroleukemia cells

Species Reactivity: Human, Non-Human Primates, Porcine, Equine (Horse)

Application: Flow Cytometry

Immunoprecipitation Western Blotting

Immunohistochemistry (frozen sections)

Immunocytochemistry

Purity: > 95% (by SDS-PAGE)

Purification: Purified by protein-A affinity chromatography

Concentration: 1 mg/ml

Storage Buffer: Azide free phosphate buffered saline (PBS), preserved by filter sterilization,

approx. pH 7.4

Storage / Stability: Store at 2-8°C. Do not freeze. Do not use after expiration date stamped on vial

label.

Expiration: See vial label

Lot Number: See vial label

Background: CD90 (Thy-1) is an 18-35 kDa GPI-anchored plasma membrane glycoprotein

expressed in many cell types, such as in hematopoietic cells and neurons, connective tissues, various fibroblast and stromal cell lines, tumor endothelial cell lines and other. It is involved in T cell activation, cellular adhesion, proliferation and migration, neurite outgrowth, wound healing, apoptosis, and fibrosis. CD90 participates in multiple signaling cascades and its effects are tissue- and cell type-specific. It often functions as an important regulator of cell-cell and cell-matrix

interactions.
