

11-775-C025

Monoclonal Antibody to CD158agh Purified Antibody (0.025 mg)

Clone: HP-MA4

Isotype: Mouse IgG2b

Specificity: The mouse monoclonal antibody HP-MA4 recognizes CD158 isoforms KIR2DL1

(CD158a), KIR2DS5 (CD158g), KIR2DS1 (CD158h), and KIRDS3. It does not

recognize the isoforms CD158b1,d,f,i,j.

Regulatory Status: RUO

Immunogen: Human NK cell line LB2

Species Reactivity: Human

Application: Flow Cytometry

Immunoprecipitation

Purity: > 95% (by SDS-PAGE)

Purification: Purified by protein-A affinity chromatography

Concentration: 1 mg/ml

Storage Buffer: Phosphate buffered saline (PBS) with 15 mM sodium azide, approx. pH 7.4

Storage / Stability: Store at 2-8°C. Do not freeze. Do not use after expiration date stamped on vial

label.

Expiration: See vial label

Lot Number: See vial label

Background: Killer cell immunoglobulin-like receptors (KIRs) are polymorphic transmembrane

glycoproteins expressed by natural killer cells and subsets of T cells. They are classified by the number of extracellular immunoglobulin domains (2D or 3D) and by whether they have a long (L) or short (S) cytoplasmic domain. KIR proteins with the long cytoplasmic domain (such as CD158a / KIR2DL1) transduce inhibitory signals upon ligand binding via an immune tyrosine-based inhibitory motif (ITIM), while KIR proteins with the short cytoplasmic domain (such as CD158g / KIR2DS5, CD158h / KIR2DS1, or KIR2DS3) lack the ITIM motif and instead associate with the TYRO protein tyrosine kinase binding protein to transduce activating signals.

The ligands for CD158 isoforms are subsets of MHC class I molecules.
