

1P-756-T100

## Monoclonal Antibody to CD255 / TWEAK Phycoerythrin (PE) conjugated (100 tests)

Clone: CARL-1

**Isotype:** Mouse IgG3

Specificity: The mouse monoclonal antibody CARL-1 recognizes CD255 / TWEAK, a type II

transmembrane protein of the TNF superfamily able to weakly induce apoptosis in

many cell types.

Regulatory Status: RUO

**Immunogen:** human CD255-transfected 2PK-3 cells

Species Reactivity: Human

Preparation: The purified antibody is conjugated with R-Phycoerythrin (PE) under optimum

conditions. The conjugate is purified by size-exclusion chromatography and

adjusted for direct use. No reconstitution is necessary.

Storage Buffer: The reagent is provided in stabilizing phosphate buffered saline (PBS) solution

containing 15mM sodium azide.

Storage / Stability: Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not

use after expiration date stamped on vial label.

Usage: The reagent is designed for Flow Cytometry analysis of human blood cells using

10  $\mu$ l reagent / 100  $\mu$ l of whole blood or 10 $^{\circ}$  cells in a suspension.

The content of a vial (1 ml) is sufficient for 100 tests.

**Expiration:** See vial label

Lot Number: See vial label

Background: CD255 / TWEAK (TNF-related weak inducer of apoptosis), a type II

transmembrane protein expressed as membrane-bound and secreted form, can induce apoptosis in many tissues and cell lines through its receptor CD266 / TWEAK R. On the other hand, in endothelial cells this interaction can induce proliferation and promote angiogenesis including neovascularization of tumours. CD255 can act in a juxtacrine manner to initiate cellular responses, and induces secretion of pro-inflammatory cytokines. Besides CD266, CD255 may also bind to

DR3.
