

CATALOGUE #: 8G16-7b

PRODUCT NAME: Disialoganglioside GD1b, bovine

Source: Bovine brain tissue.

Applications: One of the main neuronal ganglioside with disialo linkage. May act as a co-receptor for bacterial toxins (tetanus, botulinus) and marker of neural tumors (astroglioma). Can be used as immunogen for production of monoclonal antibodies that do not cross-react with GT1b or GD2.

Analysis: Purity more than 98 % by HPTLC. MW 1827

Presentation: Lyophilized from water solution.

Storage: -20 °C in lyophilized form.
After reconstitution the solution should be stored at -20 °C.
