Product Information

Product ID M184770

CAS No. 68592-15-4

Chemical Name 2-(4-Methoxy-3-prop-2-enylphenyl)-4-prop-2-enylphenol

Synonym 3,5'-Diallyl-2'-hydroxy-4-methoxybiphenyl, 4-O-methylhonokiol.

Formula $C_{19}H_{20}O_2$

Formula Wt. 280.37

Melting Point

Purity $\geq 98\%$

Solubility

Store Temp 4° C

Ship Temp Ambient

Description 4-O-Methylhonokiol is a major bioactive constituent of *Magnolia officinalis* stem bark. In a study with C57BK/6J mice, 4-O-methylhonokiol prevented high-fat-diet induced obesity and insulin resistance, in addition to restoring impaired cardiac insulin signaling. In another study using female RjOrl mice, 4-O-methylhonokiol was shown to act as a central nervous system penetrating substrate-specific inhibitor of COX-2 and as a CB2 receptor agonist. Furthermore, in high-risk HPV-16 genotype SiHa cells, treatment with 4-O-methylhonokiol suppressed the PI3K/Akt signaling pathway thereby reducing the survival of the cells. 4-O-methylhonokiol has also shown several other biological activities including anti-inflammatory, antithrombotic, anti-anxiety, antimicrobial, and anti-HIV activities.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
M184770	5 mg	\$108.00
M184770	10 mg	\$196.20
M184770	25 mg	\$441.00
M184770	100 mg	\$1378.10
