

Ubiquitin Rabbit anti-Bovine Polyclonal Antibody - LS-B3409 - LSBio	
CatalogID:	LS-B3409
Validation:	This antibody replaces catalog number LS-C103511. It has been validated for use in the following assays: IHC-P.
Target:	Ubiquitin
Host	Ubiquitin antibody was produced in Rabbit
Clonality:	Polyclonal
Immunogen Species:	Ubiquitin antibody was raised against Bovine
Antigen Type:	Native protein
Immunogen:	Ubiquitin antibody was raised against native bovine ubiquitin, conjugated to KLH.
Reactivity:	Bovine, Human, Monkey, Mouse, Rat, Dog, Guinea pig, Hamster, Pig, Rabbit, Sheep, Chicken, Xenopus, Fish, Drosophila, Yeast
Purification:	Protein A purified
Presentation:	PBS, pH 7.2, 0.09% azide, 50% glycerol
Recommended Storage:	Store at -20°C. Aliquot to avoid freeze/thaw cycles.
Usage Summary:	Immunohistochemistry: LS-B3409 was validated for use in immunohistochemistry on a panel of 21 formalin-fixed, paraffin-embedded (FFPE) human tissues after heat induced antigen retrieval in pH 6.0 citrate buffer. After incubation with the primary antibody, slides were incubated with biotinylated secondary antibody, followed by alkaline phosphatase-streptavidin and chromogen. The stained slides were evaluated by a pathologist to confirm staining specificity. The optimal working concentration for LS-B3409 was determined to be 10 ug/ml.
Uses:	IHC - Paraffin (10 µg/ml), Western blot (1:5000) (Optimal dilution to be determined by the researcher)
Size:	50 µg

Immunohistochemistry Image:

Anti-Ubiquitin antibody IHC of human testis. Immunohistochemistry of formalin-fixed, paraffin-embedded tissue after heat-induced antigen retrieval. Antibody LS-B3409 concentration 10 ug/ml.

Immunohistochemistry Image:

Anti-Ubiquitin antibody IHC of human brain, cortex, senile plaque. Immunohistochemistry of formalin-fixed, paraffin-embedded tissue after heat-induced antigen retrieval. Antibody LS-B3409 concentration 10 ug/ml.
