

MPO / Myeloperoxidase Rabbit anti-Human Polyclonal Antibody - LS-B6695 - LSBio

CatalogID:	LS-B6695
Validation:	This antibody replaces catalog number LS-C93836. It has been validated for use in the following assays: IHC-P.
Target:	myeloperoxidase (MPO)
Synonyms:	MPO Antibody, Myeloperoxidase precursor Antibody, Myeloperoxidase Antibody
Host	MPO antibody was produced in Rabbit
Clonality:	Polyclonal
Isotype:	IgG
Immunogen Species:	MPO / Myeloperoxidase antibody was raised against Human
Antigen Type:	Native protein
Immunogen:	MPO / Myeloperoxidase antibody was raised against native myeloperoxidase isolated from human leucocytes.
Specificity:	Appears to be specific for MPO.
Reactivity:	Human
Purification:	Protein G purified
Reconstitution:	Reconstitute with sterile water. Possible additional volumes for resuspension: 500 μ l
Presentation:	Lyophilized. Centrifuge to remove any insoluble material
Recommended Storage:	Maintain the lyophilized/reconstituted antibodies frozen at -20°C for long term storage and refrigerated at 2-8°C for a shorter term. When reconstituting, glycerol (1:1) may be added for an additional stability. Avoid freeze and thaw cycles.
Usage Summary:	
Uses:	IHC - Paraffin (2.5 μ g/ml), IHC - Frozen, Western blot (10 - 50 μ g/ml) (Optimal dilution to be determined by the researcher)
Size:	500 μ g
Concentration:	1 mg/ml (after resuspension)

Immunohistochemistry Image:

Anti-MPO / Myeloperoxidase antibody IHC of human spleen, neutrophils.
Immunohistochemistry of formalin-fixed, paraffin-embedded tissue after heat-induced antigen retrieval. Antibody LS-B6695 concentration 2.5 ug/ml.
