

MLLT10 Rabbit anti-Human Polyclonal (aa1013-1027) Antibody - LS-B869 - LSBio

CatalogID:	LS-B869
Validation:	This antibody replaces catalog number LS-C3119. It has been validated for use in the following assays: IHC.
Target:	myeloid/lymphoid or mixed-lineage leukemia (trithorax homolog, Drosophila); translocated to, 10 (MLLT10)
Synonyms:	MLLT10 Antibody, AF10 Antibody, Protein AF-10 Antibody, Type I AF10 protein Antibody, Type III AF10 protein Antibody, Translocated to, 10 Antibody, Type IV AF10 protein Antibody
Host	MLLT10 antibody was produced in Rabbit
Clonality:	Polyclonal
Immunogen Species:	MLLT10 antibody was raised against Human
Antigen Type:	Synthetic peptide
Immunogen:	MLLT10 antibody was raised against synthetic peptide from human MLLT10 / AF10.
Specificity:	Amino acids 1013 to 1027 of human MLLT10
Epitope:	aa1013-1027
Reactivity:	Human
Purification:	Protein G purified
Presentation:	PBS, 0.1% sodium azide.
Recommended Storage:	Long term: -20°C; Short term: +4°C. Avoid repeat freeze-thaw cycles.
Usage Summary:	Immunohistochemistry: LS-B869 was validated for use in immunohistochemistry on a panel of 21 formalin-fixed, paraffin-embedded (FFPE) human tissues after heat induced antigen retrieval in pH 6.0 citrate buffer. After incubation with the primary antibody, slides were incubated with biotinylated secondary antibody, followed by alkaline phosphatase-streptavidin and chromogen. The stained slides were evaluated by a pathologist to confirm staining specificity. The optimal working concentration for LS-B869 was determined to be 5 ug/ml.
Uses:	IHC - Paraffin (5 µg/ml), ELISA (1:000 - 1:1000) (Optimal dilution to be determined by the researcher)
Size:	50 µg
Concentration:	1 mg/ml

Immunohistochemistry Image:

Anti-MLLT10 / AF10 antibody IHC of human testis. Immunohistochemistry of formalin-fixed, paraffin-embedded tissue after heat-induced antigen retrieval. Antibody LS-B869 concentration 5 ug/ml.
