<b>Usage Summary:</b>	The fluorochrome-conjugated ALF-161 antibody is offered in 2 formats: - ug size: Can be used at less than or equal to 0.5 ug per test. A test is defined as the amount (ug)/test of antibody that will stain a cell sample in a final volume of 100 ul. Cell number should be determined empirically but can range from 11 <sup>5</sup> to 10 <sup>8</sup> cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest. - test size: has been pre-titrated can be used at test size: 5 ul (0.25ug)/test per test. A test is defined as the amount (ug)/test of antibody that will stain a cell sample in a final volume of 100 ul. Cell number should be determined empirically but can range from 11 <sup>5</sup> to 10 <sup>8</sup> cells/test.
<b>Uses:</b>	Flow Cytometry (Optimal dilution to be determined by the researcher)
