Recommended Storage:	Store at +4°C. Do not freeze. Product is photosensitive and should be protected from light.
Usage Summary:	This JJ319 antibody has been tested by flow cytometric analysis of rat splenocyte suspensions. This can be used at less than or equal to 1 ug per test. A test is defined as the amount (ug) of antibody that will stain a cell sample in a final volume of 100 ul. Cell number should be determined empirically but can range from 10^5 to 10^8 cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
Uses:	Flow Cytometry (Optimal dilution to be determined by the researcher)
Size:	50 µg or 500 µg

Flow Cytometry Image:

Staining of Lou Rat splenocytes with APC anti-rat CD5 (HIS47) (LS-C107406) and 0.5 ug of FITC Mouse IgG1, K isotype control. Total viable cells were used for analysis.
