

OSMR Mouse anti-Human Monoclonal (PE) (AN-V2) Antibody - LS-C106518 - LSBio

CatalogID:	LS-C106518
Target:	oncostatin M receptor (OSMR)
Synonyms:	OSMR Antibody, IL-31R-beta Antibody, IL-31R subunit beta Antibody, PLCA1 Antibody, Oncostatin M receptor Antibody, OSMRB Antibody, IL-31 receptor subunit beta Antibody, IL-31RB Antibody
Host	OSMR antibody was produced in Mouse
Clonality:	Monoclonal
Isotype:	IgG1
Clone Name:	AN-V2
Conjugations:	Phycoerythrin (PE)
Immunogen Species:	OSMR antibody was raised against Human
Immunogen:	OSMR antibody was raised against human OSMR
Reactivity:	Human
Purification:	Affinity purified
Presentation:	Aqueous buffer, 0.09% sodium azide, contains stabilizer if necessary
Recommended Storage:	Store at +4°C. Do not freeze. Product is photosensitive and should be protected from light.
Usage Summary:	This AN-V2 antibody has been pre-titrated and tested by flow cytometric analysis of the A375 cell line. This can be used at 5 ul (0.5 ug)/per test. A test is defined as the amount (ug)/test of antibody that will stain a cell sample in a final volume of 100 ul. Cell number should be determined empirically but can range from 10 ⁵ to 10 ⁸ cells/test.
Uses:	Flow Cytometry (Optimal dilution to be determined by the researcher)
Size:	25 tst or 100 tst

Flow Cytometry Image:

Staining of the Jurkat (left) and A375 (right) cell lines with PE Mouse IgG1, K isotype control (blue histogram) or PE Anti-human oncostatin M receptor (OSMR) (purple histogram). Total viable cells were used for analysis.
