| Usage Summary: | This H131 antibody has been pre-titrated and tested by flow cytometric analysis of normal human peripheral blood cells. This can be used at 5 ul (1.0 ug)/per test. A test is defined as the amount (ug)/test of antibody that will stain a cell sample in a final volume of 100 ul. Cell number should be determined empirically but can range from 10 ⁵ to 10 ⁸ cells/test. |
| Uses: | Flow Cytometry (Optimal dilution to be determined by the researcher) |
| Size: | 25 tst or 100 tst |
