

SSEA-1 / Lewis x / CD15 Mouse anti-Human Monoclonal (FITC) (HI98) Antibody - LS-C106856 - LSBio

CatalogID:	LS-C106856
Target:	Stage-Specific Embryonic Antigen-1/Lewis X/CD15
Host	Mouse
Clonality:	Monoclonal
Isotype:	IgM,k
Clone Name:	HI98
Conjugations:	Fluorescein (FITC)
Immunogen Species:	Human
Immunogen:	Human FUT4
Reactivity:	Human
Purification:	Affinity purified
Presentation:	PBS, pH 7.2, 500 mM sodium chloride, 0.09% sodium azide, 0.2% BSA
Recommended Storage:	Store at +4°C. Do not freeze. Product is photosensitive and should be protected from light.
Usage Summary:	The HI98 antibody has been pre-titrated and tested by flow cytometric analysis of human peripheral blood leukocytes. This can be used at 20 ul (0.125 ug)/per test. A test is defined as the amount (ug)/test of antibody that will stain a cell sample in a final volume of 100 ul. Cell number should be determined empirically but can range from 10 ⁵ to 10 ⁸ cells/test.
Uses:	Flow Cytometry (Optimal dilution to be determined by the researcher)
Size:	25 tst or 100 tst

Flow Cytometry Image:

Surface staining of normal human peripheral blood cells with anti-human CD15 (HI98) FITC. Autofluorescence is indicated by open histogram. Cells in the granulocyte population were used for analysis.
