

Mouse IgA Rat anti-Mouse Monoclonal (PE) (mA-6E1) Antibody - LS-C107154 - LSBio

CatalogID:	LS-C107154
Target:	Mouse IgA
Host	Mouse IgA antibody was produced in Rat
Clonality:	Monoclonal
Isotype:	IgG1,k
Clone Name:	mA-6E1
Conjugations:	Phycoerythrin (PE)
Immunogen Species:	Mouse IgA antibody was raised against Mouse
Immunogen:	Mouse IgA antibody was raised against mouse CD79A
Reactivity:	Mouse
Purification:	Affinity purified
Presentation:	PBS, pH 7.2, 150 mM sodium chloride, 0.09% sodium azide
Recommended Storage:	Store at +4°C. Do not freeze. Product is photosensitive and should be protected from light.
Usage Summary:	This mA-6E1 antibody has been tested by flow cytometric analysis as a second step to detect mouse IgA primary antibodies. This can be used at less than or equal to 0.125 ug per test. A test is defined as the amount (ug) of antibody that will stain a cell sample in a final volume of 100 ul. Cell number should be determined empirically but can range from 10 ⁵ to 10 ⁸ cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
Uses:	Flow Cytometry (Optimal dilution to be determined by the researcher)
Size:	50 µg or 100 µg or 200 µg
Concentration:	0.2 mg/ml or 0.2 mg/ml or 0.2 mg/ml
Requested From:	Japan
