

Fibrinogen Sheep anti-Human Polyclonal (FITC) Antibody - LS-C23562 - LSBio

CatalogID:	LS-C23562
Target:	Fibrinogen
Host	Fibrinogen antibody was produced in Sheep
Clonality:	Polyclonal
Isotype:	IgG
Conjugations:	Fluorescein (FITC)
Immunogen Species:	Fibrinogen antibody was raised against Human
Antigen Type:	Purified protein
Immunogen:	Fibrinogen antibody was raised against purified fibrinogen derived from pooled human plasma.
Specificity:	Prior to conjugation, the antibody was specific for fibrinogen when tested against human plasma by Coomassie Blue R stained double immunodiffusion and immunoelectrophoresis. Undesired immune reactivity has been removed by solid phase immunoadsorption.
Reactivity:	Human
Purification:	Affinity purified
Presentation:	20 mM Tris, 70 mM sodium chloride, pH 8.0, 0.1% sodium azide. Labeled, fluorescein isothiocyanate (FITC).
Recommended Storage:	Long term: Add glycerol (40-50%) -20°C; Short term: +4°C
Usage Summary:	Suitable for use in Immunofluorescence (direct or indirect) and Fluorescence microscopy. 1. Incident Light Excitation. Direct Immunofluorescence: 1:10-1:100. Indirect Immunofluorescence: 1:20-1:400. 2. Transmitted Light Excitation. Direct Immunofluorescence: 1:5-1:40. Indirect Immunofluorescence: 1:10-1:80.
Uses:	Immunofluorescence (1:10 - 1:100) (Optimal dilution to be determined by the researcher)
Size:	2,000 µl
Requested From:	Japan
