

Fibrinogen Sheep anti-Human Polyclonal (FITC) Antibody - LS-C56206 - LSBio

CatalogID:	LS-C56206
Target:	Fibrinogen
Host	Fibrinogen antibody was produced in Sheep
Clonality:	Polyclonal
Conjugations:	Fluorescein (FITC)
Immunogen Species:	Fibrinogen antibody was raised against Human
Antigen Type:	Native protein
Immunogen:	Fibrinogen antibody was raised against native.
Specificity:	Detects human fibrinogen, a 340kD soluble plasma glycoprotein which is synthesized by the liver. Fibrinogen is an inactive zymogen which is activated by thrombin in the coagulation cascade to form fibrin, the most abundant component of blood clots. Fibrinogen activation is also involved in cellular and matrix interactions, the inflammatory response, cardiovascular disease and neoplasia.
Reactivity:	Human, Mouse, Rat
Purification:	Affinity purified
Presentation:	PBS, pH 7.4, 0.09% sodium azide.
Recommended Storage:	+4°C or -20°C, Avoid repeated freezing and thawing.
Uses:	Immunofluorescence (1:10 - 1:100) (Optimal dilution to be determined by the researcher)
Size:	1,000 µl
Concentration:	1 mg/ml
Requested From:	Japan

Laboratory Reagent For In Vitro Research Use Only
