

Human IgG Donkey anti-Human Polyclonal (Fab'2) (PE) Antibody - LS-C61403 - LSBio	
CatalogID:	LS-C61403
Target:	Human IgG
Host	Human IgG antibody was produced in Donkey
Clonality:	Polyclonal
Isotype:	IgG
Conjugations:	Phycoerythrin (PE)
Modifications:	Fab'2
Immunogen Species:	Human IgG antibody was raised against Human
Antigen Type:	Purified protein
Immunogen:	Human IgG antibody was raised against human IgG whole molecule.
Specificity:	anti-Phycoerythrin, anti-Donkey Serum, Human IgG and Human Serum. No reaction was observed against anti-Pepsin, anti-Donkey IgG F(c), Bovine, Chicken, Goat, Guinea Pig, Syrian Hamster, Horse, Mouse, Rabbit, Rat or Sheep Serum Proteins
Reactivity:	Human
Purification:	Immunoaffinity purified
Presentation:	0.02 M potassium phosphate, 0.15 M sodium chloride, pH 7.2, 10 mg/ml BSA (IgG, protease free), 0.02% sodium azide.
Recommended Storage:	Store at 4°C. Do not freeze.
Usage Summary:	Suitable for immunomicroscopy and flow cytometry or FACS analysis as well as other antibody based fluorescent assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity. The maximum amount of reagent required to stain 1 x 10 ⁶ cells in flow cytometry is approximately 1.0 ug of antibody conjugate. Lesser amounts of reagent may be sufficient for staining. As a general guideline dilutions of 1:50 to 1:200 should be suitable for most applications.
Uses:	Immunofluorescence, Flow Cytometry (Optimal dilution to be determined by the researcher)
Size:	500 µg
Requested From:	Japan
