

BrdU Mouse Monoclonal Antibody - LS-C77272 - LSBio

CatalogID:	LS-C77272
Target:	Bromodeoxyuridine (BrdU)
Host	Bromodeoxyuridine (BrdU) antibody was produced in Mouse
Clonality:	Monoclonal
Isotype:	IgG2a
Antigen Type:	Hapten
Immunogen:	BrdU antibody was raised against bromodeoxyuridine.
Specificity:	Specific for bromodesoxyuridine and does not cross-react with thymidine. It is a valuable tool for detection of S-phase (DNA-synthesizing cells) in cell and tissue culture.
Purification:	Protein A purified
Reconstitution:	Sterile 40-50% glycerol. Possible additional volumes for resuspension: 100 µl
Presentation:	Lyophilized from PBS, pH 7.4, 0.5% BSA, 0.09% sodium azide. Reconstitute to a final volume of 1ml.
Usage Summary:	Suitable for use in Immunofluorescence microscopy. Also suitable for Detection of bromodeoxyuridine incorporation in tissue and cell culture; 3H-thymidine labeling techniques can be avoided. Immunofluorescence microscopy: 1:10; Incubation Time 30 min at RT.
Uses:	Immunofluorescence (1:10) (Optimal dilution to be determined by the researcher)
Size:	100 µg
Requested From:	Japan
