

BrdU Sheep Polyclonal Antibody - LS-C84001 - LSBio

CatalogID:	LS-C84001
Target:	Bromodeoxyuridine (BrdU)
Host	Bromodeoxyuridine (BrdU) antibody was produced in Sheep
Clonality:	Polyclonal
Immunogen:	BrdU antibody was raised against brdU coupled to keyhole limpet hemocyanin (KLH).
Specificity:	Anti-BrdU is used for for staining of bromodeoxyuridine incorporated into DNA of replicating cells. When utilized in 10 ug/mL concentration, the product is comparable to commercially available monoclonal antibodies commonly used for the same purpose. This sheep reagent is useful for multiple labeling experiments. Denature DNA sample first so that bases are accessible to BrdU antibody.
Purification:	Protein G purified
Presentation:	Phosphate buffered saline with no preservatives
Recommended Storage:	Long term: -70°C; Short term: -20°C; Avoid freeze-thaw cycles.
Uses:	ICC, Immunoprecipitation (Optimal dilution to be determined by the researcher)
Size:	250 µg
Requested From:	Japan

Laboratory Reagent For In Vitro Research Use Only
