

GGA2 Rabbit anti-Mouse Polyclonal Antibody - LS-C94066 - LSBio

CatalogID:	LS-C94066
Target:	golgi-associated, gamma adaptin ear containing, ARF binding protein 2 (GGA2)
Synonyms:	GGA2 Antibody, KIAA1080 Antibody, VEAR Antibody
Host	GGA2 antibody was produced in Rabbit
Clonality:	Polyclonal
Isotype:	IgG
Immunogen Species:	GGA2 antibody was raised against Mouse
Antigen Type:	Synthetic peptide
Immunogen:	GGA2 antibody was raised against a synthetic peptide from the GAT domain of mouse GGA2 (Golgi-localized, gamma ear-containing, ARF-binding protein 2) conjugated to an immunogenic carrier protein was used as the immunogen. The antigen is homologous in rat.
Specificity:	Appears to be specific for GGA2.
Reactivity:	Mouse, Rat
Purification:	Purified
Reconstitution:	Reconstitute with sterile water. Possible additional volumes for resuspension: 500 μ l
Presentation:	Lyophilized. Centrifuge to remove any insoluble material
Recommended Storage:	Maintain the lyophilized/reconstituted antibodies frozen at -20°C for long term storage and refrigerated at 2-8°C for a shorter term. When reconstituting, glycerol (1:1) may be added for an additional stability. Avoid freeze and thaw cycles.
Usage Summary:	IHC: Antigen retrieval is essential for use on paraffin sections.
Uses:	Western blot (10 - 50 μ g/ml) (Optimal dilution to be determined by the researcher)
Size:	500 μ g
Concentration:	1 mg/ml (after resuspension)
Requested From:	Japan
