Product Datasheet

Vanilloid R1/TRPV1 Antibody NBP1-71774SS

Unit Size: 0.025 ml

Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.

Preservative 0.05% Sodium Azide Purity Immunogen affinity purified	
Purity Immunogen affinity purified	
Buffer PBS, 30% glycerol	
Product Description	
Host Rabbit	
Gene ID 7442	
Gene Symbol TRPV1	
Species Human, Mouse	
Species Reactivity Human and mouse.	
A genomic peptide made to a C-terminal region of the human TRPV1 pro (within residues 725-839). [Swiss-Prot Q8NER1]	otein
Notes Manufactured by Genomic Antibody Technology™. GAT <u>FAQs</u>	
Product Application Details	
Applications Immunocytochemistry/Immunofluorescence, Immunohistochemistry, Immunohistochemistry-Paraffin	
Recommended Dilutions Immunocytochemistry/Immunofluorescence 1:50-1:100, Immunohistochemistry-Paraffin 1:200	emistry
Application Notes This TRPV1 antibody is useful for ICC/IF and IHC-paraffin embedded tiss Prior to immunostaining paraffin tissues, antigen retrieval with sodium cit buffer (pH 6.0) is recommended.	

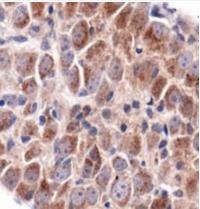

Images

Immunocytochemistry/Immunofluorescence: TRPV1 Antibody [NBP1-71774] - TRPV1 antibody was tested at 1:50 in HeLa cells with FITC (green). Nuclei were counterstained with Dapi (blue).

Immunohistochemistry: TRPV1 Antibody [NBP1-71774] - Analysis of TRPV1 in mouse dorsal root ganglion using DAB with hematoxylin counterstain.

Procedures

Immunohistochemistry-Paraffin protocol for TRPV1 Antibody (NBP1-71774)

Immunohistochemistry-Paraffin Embedded Sections

Antigen Unmasking:

Bring slides to a boil in 10 mM sodium citrate buffer (pH 6.0) then maintain at a sub-boiling temperature for 10 minutes. Cool slides on bench-top for 30 minutes.

Staining:

- 1. Wash sections in deionized water three times for 5 minutes each.
- 2. Wash sections in wash buffer for 5 minutes.
- 3. Block each section with 100-400 ul blocking solution for 1 hour at room temperature.
- 4. Remove blocking solution and add 100-400 ul diluted primary antibody. Incubate overnight at 4C.
- 5. Remove antibody solution and wash sections in wash buffer three times for 5 minutes each.
- 6. Add 100-400 ul biotinylated diluted secondary antibody. Incubate 30 minutes at room temperature.
- 7. Remove secondary antibody solution and wash sections three times with wash buffer for 5 minutes each.
- 8. Add 100-400 ul Streptavidin-HRP reagent to each section and incubate for 30 minutes at room temperature.
- 9. Wash sections three times in wash buffer for 5 minutes each.
- 10. Add 100-400 ul DAB substrate to each section and monitor staining closely.
- 11. As soon as the sections develop, immerse slides in deionized water.
- 12. Counterstain sections in hematoxylin.
- 13. Wash sections in deionized water two times for 5 minutes each.
- 14. Dehydrate sections.
- 15. Mount coverslips.

Immunocytochemistry/Immunofluorescence Protocol for TRPV1 Antibody (NBP1-71774)

Immunocytochemistry Protocol

Culture cells to appropriate density in 35 mm culture dishes or 6-well plates.

- 1. Remove culture medium and add 10% formalin to the dish. Fix at room temperature for 30 minutes.
- Remove the formalin and add ice cold methanol. Incubate for 5-10 minutes.
- 3. Remove methanol and add washing solution (i.e. PBS). Be sure to not let the specimen dry out. Wash three times for 10 minutes.
- 4. To block nonspecific antibody binding incubate in 10% normal goat serum from 1 hour to overnight at room temperature.
- 5. Add primary antibody at appropriate dilution and incubate at room temperature from 2 hours to overnight at room temperature.
- 6. Remove primary antibody and replace with washing solution. Wash three times for 10 minutes.
- 7. Add secondary antibody at appropriate dilution. Incubate for 1 hour at room temperature.
- 8. Remove antibody and replace with wash solution, then wash for 10 minutes. Add Hoechst 33258 to wash solution at 1:25,0000 and incubate for 10 minutes. Wash a third time for 10 minutes.
- 9. Cells can be viewed directly after washing. The plates can also be stored in PBS containing Azide covered in Parafilm (TM). Cells can also be cover-slipped using Fluoromount, with appropriate sealing.

*The above information is only intended as a guide. The researcher should determine what protocol best meets their needs. Please follow safe laboratory procedures."
