## **Product Datasheet**

### Irisin/FNDC5 Antibody NBP2-59680SS

Unit Size: 0.025 mg

Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.

#### NBP2-59680SS

Irisin/FNDC5 Antibody

Product Information	
Unit Size	0.025 mg
Concentration	1.0 mg/ml
Storage	Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.
Clonality	Polyclonal
Preservative	0.02% Sodium Azide
Isotype	IgG
Purity	Immunogen affinity purified
Buffer	PBS
Product Description	
Host	Rabbit
Gene ID	252995
Gene Symbol	FNDC5
Species	Human, Mouse
Immunogen	Partial recombinant protein made to an internal region of the human Irisin/FNDC5 protein (amino acids 32-143) [UniProt Q8NAU1]
Product Application Details	
Applications	Western Blot, Immunohistochemistry, Immunohistochemistry-Paraffin
Recommended Dilutions	Western Blot 0.5 - 1.0 ug/ml, Immunohistochemistry 1:200, Immunohistochemistry-Paraffin 1:200
Application Notes	This antibody was tested in WB on recombinant Irisin protein.

#### Images

Immunohistochemistry-Paraffin: Irisin/FNDC5 Antibody [NBP2-59680] -IHC analysis of a formalin fixed and paraffin embedded human kidney tissue section (NBP1-78269) using 1:200 dilution of Irisin/FNDC5 antibody. The signal was developed with HRP-DAB detection and the sections were counterstained with hematoxylin. The antibody generated a membrane cytoplasmic staining in almost all of the cell types in the tested section.

rocedures
<ul> <li>Vestern Blot Protocol for Irisin/FNDC5 Antibody (NBP2-59680)</li> <li>Perform SDS-PAGE on samples to be analyzed, loading 25 ug of total protein per lane.</li> <li>Transfer proteins to membrane according to the instructions provided by the manufacturer of the nembrane and transfer apparatus.</li> <li>Stain according to standard Ponceau S procedure (or similar product) to assess transfer success, nd mark molecular weight standards where appropriate.</li> <li>Rinse the blot.</li> </ul>
. Block the membrane using standard blocking buffer for at least 1 hour. . Wash the membrane in wash buffer three times for 10 minutes each. . Dilute anti-Irisin/FNDC5 primary antibody in blocking buffer and incubate 1 hour at room emperature.
. Wash the membrane in wash buffer three times for 10 minutes each. . Apply the diluted HRP conjugated secondary antibody in blocking buffer (as per manufacturers nstructions) and incubate 1 hour at room temperature. 0. Wash the blot in wash buffer three times for 10 minutes each (this step can be repeated as equired to reduce background).
1. Apply the detection reagent of choice in accordance with the manufacturers instructions. lote: Tween-20 can be added to the blocking or antibody dilution buffer at a final concentration of 0.05 0.2%.
mmunocytochemistry/Immunofluorescence Protocol for Irisin/FNDC5 Antibody (NBP2-59680) culture cells to appropriate density in 35 mm culture dishes or 6-well plates.
. Remove culture medium and add 10% formalin to the dish. Fix at room temperature for 30 minutes. . Remove the formalin and add ice cold methanol. Incubate for 5-10 minutes. . Remove methanol and add washing solution (i.e. PBS). Be sure to not let the specimen dry out. Vash three times for 10 minutes.
To block nonspecific antibody binding incubate in 10% normal goat serum from 1 hour to overnight troom temperature. Add primary antibody at appropriate dilution and incubate at room temperature from 2 hours to

Add primary antibody at appropriate dilution and incubate at room temperature from 2 hours to overnight at room temperature.

6. Remove primary antibody and replace with washing solution. Wash three times for 10 minutes.

7. Add secondary antibody at appropriate dilution. Incubate for 1 hour at room temperature.
 8. Remove antibody and replace with wash solution, then wash for 10 minutes. Add Hoechst 33258 to wash solution at 1:25,0000 and incubate for 10 minutes. Wash a third time for 10 minutes.

9. Cells can be viewed directly after washing. The plates can also be stored in PBS containing Azide covered in Parafilm (TM). Cells can also be cover-slipped using Fluoromount, with appropriate sealing.

\*The above information is only intended as a guide. The researcher should determine what protocol best meets their needs. Please follow safe laboratory procedures.
