## JC-1 iodide

## Instruction Manual

Catalog Number	PK-CA707-70014
Description	JC-1 is a mitochondrial dye that stains mitochondria in living cells in a membrane potential- dependent fashion. JC-1 monomer is in equilibrium with so-called J-aggregates, which are favored at higher dye concentration or higher mitochondrial membrane potential. The monomer JC-1 has green fluorescence ((em = 527 nm), while the J-aggregates have red fluorescence ((em = 590 nm). Therefore, it has been possible to use fluorescence ratioing technique to study mitochondrial membrane potentials. JC-1 is particularly useful for apoptosis studies. In apoptotic cells, the dye stays in the cytoplasm and fluoresces green. It has also been applied in high throughput drug screening applications. Extinction coefficient (in MeOH, 505 nm) = 190,000. PromoKine offers JC-1 in both chloride salt (PK-CA707-70011) and iodide salt (PK-CA707- 70014) forms. Both forms have identical spectral properties. The iodide form has been used in most of the publication. However, some researchers may prefer the chloride form since Cl- is the most prevalent anion in biological systems.
Quantity	5 mg
Excitation / Emission Maxima	see "Description"
Molecular Structure	$C \stackrel{C}{\stackrel{H_2C}{\longrightarrow}} \stackrel{H_2C}{\stackrel{H_3}{}} \stackrel{C}{\stackrel{H_2C}{}} \stackrel{H_3}{\stackrel{H_3}{}} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{} \stackrel{C}{\stackrel{H_3C}{}} \stackrel{C}{\stackrel{H_3C}{} \stackrel{L}{\stackrel{H_3C}{} \stackrel{L}{\stackrel{H_3C}{} \stackrel{L}{\stackrel{H_3C}{} \stackrel{L}{\stackrel{H_3C}{} \stackrel{L}{\stackrel{H_3C}{} \stackrel{L}{\stackrel{H_3C}{} \stackrel{L}{\stackrel{L}{\stackrel{H_3C}{} \stackrel{L}{\stackrel{H_3C}{} \stackrel{L}{\stackrel{L} \stackrel{L}{\stackrel{L} \stackrel{L}{\stackrel{L} \stackrel{L}{\stackrel{L} \stackrel{L}{\stackrel{L} \stackrel{L}{\stackrel{L} \stackrel{L} $
Molecular Weight / Molecular Formula	652 Da; C₂₅H₂7Cl₄IN₄
Purity	>99% (as determined by HPLC)
Appearance / Formulation / Solubility	Red solid; soluble in DMSO.
Storage & Stability	Store desiccated at 4°C. Protect from light, especially when in solution.
Applications	See Description

Caution	Potentially harmful. Avoid prolonged or repeated exposure. Avoid getting in eyes, on skin, or on clothing. Wash thoroughly after handling. If eye or skin contact occurs, wash affected areas with plenty of water for 15 minutes and seek medical advice. In case of inhaling or swallowing, move individual to fresh air and seek medical advice immediately.

FOR IN VITRO RESEARCH USE ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC PROCEDURES.
