Neuron Function Modulation

Catalog #	G-028-11
Standard Size	200 µg
Sequence	His - Ala - Glu - Gly - Thr - Phe - Thr - Ser - Asp - Val - Ser - Ser - Tyr - Leu - Glu - Gly - Gln - Ala - Ala - Lys - Glu - Phe - Ile - Ala - Trp - Leu - Val - Lys - Gly - Arg - NH ₂
Species	Human, Rat, Mouse, Porcine, Bovine, Ovine, Canine
Host	Rabbit
Reconstitution	For consistent and reproducible results, reconstitute with 260µl of distilled water and 740µl of PBS (or 50% glycerol in PBS) for the equivalent of undiluted antibody, immediately before use. If a precipitate is present after reconstitution, spin down and use supernatant only. Do not refreeze any unused portions.
Storage Condition	For optimal results, use the antibody as soon as possible after reconstitution. Store in lyophilized form unless needed and reconstitute immediately before use. Once reconstituted, the antibody should be stable for a few days at -4°C. For storage up to a few months, prepare small aliquots after reconstitution and freeze at -20°C or -80°C. Repeated freeze thaw cycles should be strictly avoided.
Contents	This vial contains 1mg of rabbit IgG in 260µl of PBS (137mM NaCl, 2.7mM KCl, 4.3mM Na ₂ HPO ₄ , 1.4mM KH ₂ PO ₄ , pH 7.2) in the lyophilized form.
