Reconstitution	For consistent and reproducible results, reconstitute with 200µl of distilled water and 200µl PBS (or 50% glycerol in PBS) for the equivalent of undiluted antibody, immediately before use. Do not refreeze any unused portions.	
Storage Condition	For optimal results, use the antibody as soon as possible after reconstitution. Store in lyophilized form unless needed and reconstitute immediately before use. Once reconstituted, the antibody should be stable for a few days at -4°C. For storage up to a few months, prepare small aliquots after reconstitution and freeze at -20°C or -80°C. Repeated freeze thaw cycles should be strictly avoided.	
Contents	This vial contains 400µg of rabbit IgG in 200µl PBS (137 mM NaCl, 2.7 mM KCl, 4.3 mM Na ₂ HPO ₄ , 1.4 mM KH ₂ PO ₄ , pH 7.5) in the lyophilized form.
