## Product Name: Mirin

Catalog No.: 3190
Batch No.: 2
CAS Number:
1198097-97-0
IUPAC Name: Z-5-(4-Hydroxybenzylidene)-2-imino-1,3-thiazolidin-4-one

1. PHYSICAL AND CHEMICAL PROPERTIES
Batch Molecular Formula:
Batch Molecular Weight:
Physical Appearance:
Solubility:
Storage:
Batch Molecular Structure:
$\mathrm{C}_{10} \mathrm{H}_{8} \mathrm{~N}_{2} \mathrm{O}_{2} \mathrm{~S} .3 / 4 \mathrm{H}_{2} \mathrm{O}$
233.76
Pale yellow solid
DMSO to 100 mM
Store at $+4^{\circ} \mathrm{C}$

2. ANALYTICAL DATA

HPLC:
${ }^{1} \mathrm{H}$ NMR:
Mass Spectrum:
Microanalysis:

Shows 100\% purity
Consistent with structure
Consistent with structure
Carbon Hydrogen Nitrogen

## Product Name: Mirin

Catalog No.: 3190
Batch No.: 2

CAS Number: 1198097-97-0<br>IUPAC Name: Z-5-(4-Hydroxybenzylidene)-2-imino-1,3-thiazolidin-4-one

## Description:

Mre11-Rad50-Nbs1 (MRN)-ATM pathway inhibitor that blocks the $3^{\prime}$ and 5' exonuclease activity associated with Mre11. Prevents ATM activation in response to double strand breaks $\left(\mathrm{IC}_{50}=12 \mu \mathrm{M}\right)$ and induces $\mathrm{G}_{2}$ cell cycle arrest. Also blocks homology-directed repair in vitro.

## Physical and Chemical Properties:

Batch Molecular Formula: $\mathrm{C}_{10} \mathrm{H}_{8} \mathrm{~N}_{2} \mathrm{O}_{2} \mathrm{~S} .3 / 4 \mathrm{H}_{2} \mathrm{O}$
Batch Molecular Weight: 233.76
Physical Appearance: Pale yellow solid
Minimum Purity: >99\%
Batch Molecular Structure:

## Storage: Store at $+4^{\circ} \mathrm{C}$

## Solubility \& Usage Info:

DMSO to 100 mM

## Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a $45-60^{\circ} \mathrm{C}$ water bath).
Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:
SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.
SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at $-20^{\circ} \mathrm{C}$ or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.

## Other Information:

In the literature (Garner et al (2009) Nat.Chem.Biol. 5 129) Mirin is reported as an orange solid. However, this coloration was found to have been caused by a brightly colored impurity. Upon further purification, Mirin was obtained as a pale yellow solid.
