Product Name: Dopamine hydrochloride

CAS Number: 62-31-7 IUPAC Name: 3,4-Dihydroxyphenethylamine hydrochloride Catalog No.: 3548 EC Number: 200-527-8 Batch No.: 1

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: Batch Molecular Weight: Physical Appearance: Solubility:

Batch Molecular Structure:

C₈H₁₁NO₂.HCl 189.64 White solid water to 100 mM DMSO to 100 mM Store at -20°C

HO NH_2 .HCI HO

2. ANALYTICAL DATA

Storage:

HPLC:	Shows 99.2% purity
¹ H NMR:	Consistent with structure
Mass Spectrum:	Consistent with structure
Microanalysis:	Carbon Hydrogen Nitrogen
	Theoretical 50.67 6.38 7.39
	Found 50.42 6.25 7.41

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Information

www.tocris.com

Print Date: Oct 9th 2014

Batch No.: 1

Product Name: Dopamine hydrochloride

CAS Number: 62-31-7 IUPAC Name: 3,4-Dihydroxyphenethylamine hydrochloride

Description:

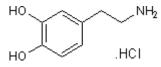

Endogenous neurotransmitter that acts as an agonist at dopamine D_{1-5} receptors. Synthesized in the substantia nigra and ventral tegmental area, and is a precursor in noradrenalin and adrenalin biosynthesis. Caged dopamine is also available (Cat. No 3992).

Physical and Chemical Properties:

Batch Molecular Formula: C₈H₁₁NO₂.HCl Batch Molecular Weight: 189.64 Physical Appearance: White solid

Minimum Purity: >99%

Batch Molecular Structure:

Storage: Store at -20°C

Solubility & Usage Info:

water to 100 mM DMSO to 100 mM

This product is susceptible to oxidation and may decompose in solution. It is recommended that solutions are freshly prepared and used promptly.

Catalog No.: 3548

EC Number: 200-527-8

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
