Description:

Reversible, non-ATP competitive inhibitor of mitotic kinesin-like protein 2 (MKLP-2) ($K_i = 3.4 \mu\text{M}$). Inhibits the basal ATPase activity of MKLP-2 ($\text{IC}_{50} = 1.35 \mu\text{M}$). Exhibits selectivity for MKLP-2 over 12 other members of the kinesin superfamily, including the closely-related MKLP-1. Cell permeable.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
