**Description:**

GPR35 agonist (pEC<sub>50</sub> values are 7.59 and 8.36 for β-arrestin and Gα<sub>q+i5</sub> Ca<sup>2+</sup> assays respectively). Displays 1000-fold greater potency at human GPR35 receptors relative to mouse and rat GPR35 orthologs in an IP1 accumulation assay. More potent than zaprinast (Cat. No. 0947).

**Stability and Solubility Advice:**

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

**SOLIDS:** Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

**SOLUTIONS:** We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
