

DESCRIPTION

Species Reactivity	Sheep
Specificity	Sheep IgG specific IgG was purified by sheep IgG (H+L) affinity chromatography and absorbed against human IgG, and human, mouse, bovine, and rabbit serum to eliminate cross-reactivity.
Source	Polyclonal Donkey IgG
Purification	Antigen Affinity-purified
Immunogen	Sheep IgG
Conjugate	Allophycocyanin Excitation Wavelength: 620-650 nm Emission Wavelength: 660-670 nm
Formulation	Supplied in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details. *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. *General Protocols* are available in the *Technical Information* section on our website.

Flow Cytometry	Designed for use as a secondary developing reagent in immunofluorescent assays, such as flow cytometry, where the primary antibody does not have a fluorescent reporter, is of sheep origin, and is of IgG class. The recommended concentration is 10 $\mu\text{L}/10^6$ cells.
